

Test Petition Title

Dear fellow open-source enthusiasts,

We are gathered here today to address a critical issue that has plagued our community for far too long. We need to stop the madness and bring some much-needed sanity to our projects.

We are, of course, referring to the use of Comic Sans in our code.

Yes, we know it's a funny font, and it brings a smile to your face. But let's be honest, it's not very professional. It's time to say goodbye to the days of code looking like a grade-schooler's art project.

We hereby petition all open-source projects to ban Comic Sans from their codebases. We suggest that projects adopt a strict policy of using only professional-looking fonts, such as Times New Roman or Arial.

Let's take our coding seriously and show the world that we mean business. Say no to Comic Sans and yes to professionalism!
